

# BEAT

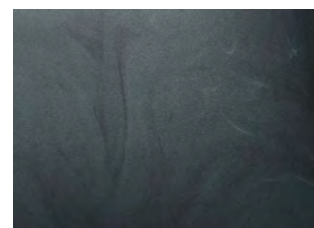

With its retro shape, BEAT ensures a great overall experience for all environments.

BEAT has great stacking possibilities, leaving a minimal footprint and minimal visual distraction. The circular opening in the center ensures that BEAT stacks neatly, tight and with exact precision. BEAT has no screws and the seat clicks into place when assembled.

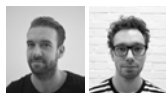

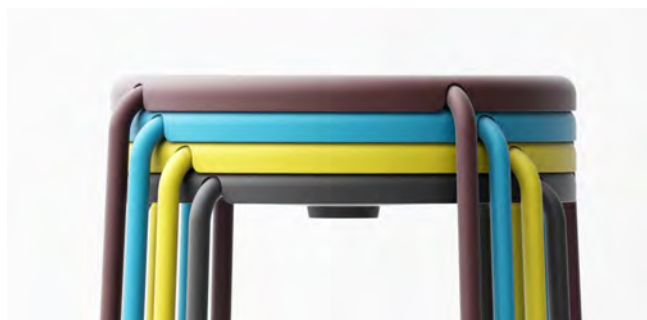

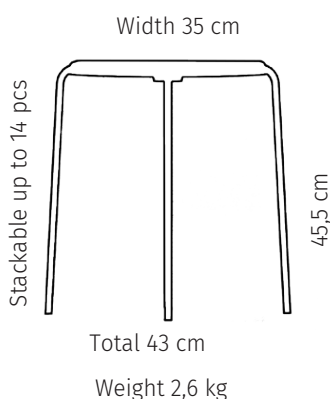

The material of the seat is both in recycled material in ocean green and ocean black, as well as other plastic colors in polypropylene.

Ocean Green

Ocean Black
